

# Don't replace it... "Mud Jack" it!

## Concrete Leveling, Lifting, & Mud Jacking

Concrete lifting & leveling also referred to as slab jacking is accomplished by drilling a series of holes in the concrete; injecting a grout into these holes using hydrostatic pressure with a specialized grout pump at the right balance of psi to lift, level, and stabilize the concrete back to its original position.

## Reduces Cost of Replacement with Less Mess

Professional concrete lifting, mud jacking & leveling is a cost-effective way to restore your damaged concrete surfaces, from patios to driveways and pool decks.

Whether you own residential or commercial property, you will benefit from our expertise: Your concrete will be leveled and stabilized. This process eliminates eyesores and injury risks and restores property values.

With over 40 years of slabjacking experience, Tri-State Concrete Services, Inc. can handle just about any mud jacking job you may have.

Serving York, Adams, Lancaster, Harrisburg, Baltimore & Harford Counties for all of your concrete leveling, mud jacking and slab jacking needs!

If you are a member of a Home Owners Association, or a Property Management Company, we can save you money on your concrete repairs!

17378 Maize Road  
Stewartstown, PA 17363

717-880-5636

## The Alternative to Concrete Replacement

## Do you have uneven concrete slabs?

## Before you replace it... MUDJACK it!

## Benefits of Mud Jacking

- ✓ Mud Jacking is about half the cost of replacing the concrete
- ✓ Get years of continued use out of your existing concrete
- ✓ Can be done with no disruption to surrounding structures, and very little (if any) disruption to landscaping
- ✓ No need to remove heavy (or permanently installed) fixtures/structures/furniture on the concrete slab, as the mud jacking process can lift both the slab and the items on it
- ✓ And perhaps best of all, there is no wait time to begin using your newly raised concrete surface!

## Mud Jacking is Eco Friendly

What's also positive about Mud Jacking is the fact that it's eco-friendly. When you compare this method to the alternatives, you'll see why business homeowners who are concerned about their carbon footprint choose concrete lifting.

## Commercial & Residential

The Mud Jacking process is the ideal solution for both commercial and residential concrete leveling repairs.

### If it's concrete, we lift it!

- ✓ Patios & Porches
- ✓ Sidewalks & Stairs
- ✓ Driveways
- ✓ Pool Decks
- ✓ Garage Floors
- ✓ And MORE!
